

Stevens Johnson's Syndrome in patients put on Carbamazepine / Tegretol 200mg b.d

The National Pharmacovigilance Committee of the Ministry of Health and Quality of Life has informed the Medical Council of Mauritius that it has received three reports during the month of May and June 2012 concerning patients put on Carbamazepine / Tegretol 200mg b.d who have developed Stevens Johnson's Syndrome.

All medical practitioners are therefore requested to take note of the above whenever prescribing Carbamazepine / Tegretol to patients.
